Description

COMPOUNDING PAD-Hard (White)

Intended use: Car refinishing product/ Polishing, grinding

General characteristics:

- for mechanical polishing and grinding;
- suited for using with coarse-grained polishing pastes.

Product characteristics:

-structure of the foam allow to hold the water inside the pad, what decrease the temperature of the polishing surface.

-the pad does not get into vibration during the work, which has a considerable effect on its life time.

-the holder is made from very strong, reusable material. It allows the pad to be securely fitted into the polisher.

-the plastic holder is topped with the nut what easily and permanently allow to install and uninstall the pad on the polisher/sander.

-Color: White

Available sizes: 150mm x 50mm

Available holders: M14,5/8

Available types of working surface:

- flat
